

\*\*The information contained herein is accurate at the time prepared. These prices are indicative only. They are available for consumers with an excellent credit rating and requiring more than 1,000 GJ/day. NO DEALS should ever be executed based on this sheet.

### Natural Gas Market Prices

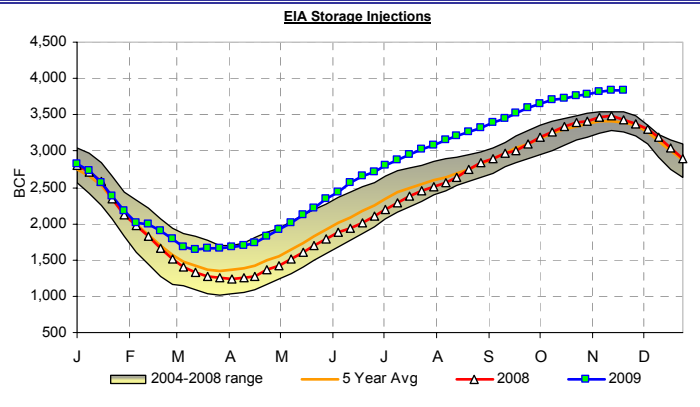

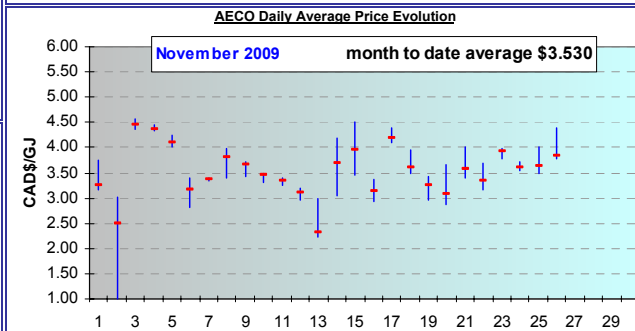

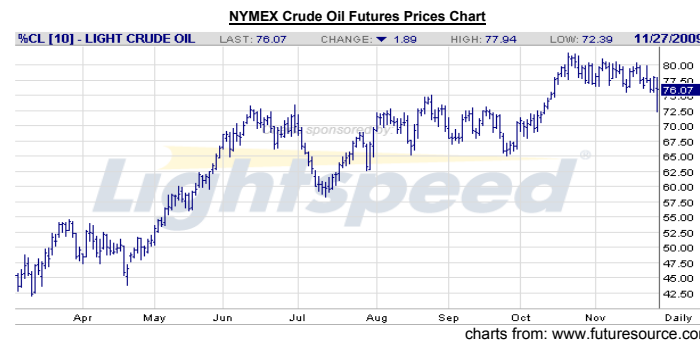

The prices quoted are indicative only and are representative of wholesale quantities (1,000 GJ/day)

	Dec09	Dec09	Dec09	Dec09	Nov10	
	Mar10	1-year	2-year	3-year	Oct11	
AECO/NIT, AB	\$5.30	\$5.40	\$5.90	\$6.15	\$6.35	Cdn\$/GJ
NYMEX/Henry Hub	\$5.20	\$5.45	\$6.00	\$6.30	\$6.50	US/MMBtu

**Information**  
 Natural gas futures climbed 5% this week to above US \$5.15, on economic data that suggested a recovery of US gas energy demand. US Government data showed increases in consumer spending and home sales last month, while unemployment claims fell to the lowest level since September 2008.

Traders were also buying back previously sold contracts to hedge against possible cold weather over the US Thanksgiving holiday weekend. The National Weather Service was predicting below-normal temperatures across most of the eastern two-thirds of the US from the end of November into December.

US natural gas inventories rose 2 Bcf in the week ended November 20, the Energy Information Administration reported. At 3,835 Bcf, stocks were 404 Bcf higher than last year at this time and 442 Bcf above the 5-year average.

### EIA Storage Report (Bcf)

For the week ending November 20, 2009

	This Week	Last Week	Diff.	Average	Diff.
